SUMMARY

Fifth-year Artificial Intelligence Engineering student at the National Higher School of Artificial Intelligence (ENSIA), with a Baccalaureate score of 18.29/20. Experienced in developing machine learning, natural language processing, computer vision, time-series analysis, and industrial AI applications through academic and industry projects, including a two-month internship at Sonatrach. Passionate about building intelligent systems that solve real-world problems while continuously expanding expertise across diverse AI domains.

PROJECTS

- **Algerian Fake News Classification** (Python, NLP, Streamlit) — Detects fake news in Algerian dialect media using NLP and ML. [Live Demo](#)
- **Agricultural Land Optimizer** (Python, Streamlit) — AI-driven crop recommendations for Algerian wilayas based on spatial data and consumption targets. [Live Demo](#)
- **Sleep Analysis Forecasting** (Python) — EEG sleep-stage classification using time-series ML models. [Live Demo](#)
- **Predicting Winning Teams in Dota 2 Matches** (Python, Streamlit) — ML prediction pipeline for match outcomes, deployed with Streamlit. [Live Demo](#)
- **Handwritten CV Classification** (Computer Vision) — Mini computer vision project for classifying handwritten CVs.
- **SougLink** (Flutter) — Mobile platform linking farmers with market sellers for fair pricing and simplified ordering. [App](#)
- **Convex Town** (Game Development) — Murder mystery game with AI-driven elements, built during a hackathon. [GitHub](#)

INTERNSHIP EXPERIENCE

Sonatrach — 2-Month Internship

- **AI-Based Missing Well Logs Imputation** (Team Project, Month 1) — Developed an AI-assisted application for analyzing and visualizing well log data, supporting missing well log imputation and geological data interpretation. Technologies: Python, Streamlit, Pandas. [Demo](#)
- **LNG Turbine Predictive Maintenance** (Individual Project, Month 2) — Developed an industrial application supporting LNG turbine predictive maintenance workflows and data analysis to anticipate failures and reduce downtime. Technologies: Python.

SKILLS

Programming: Python, C++, JavaScript (React), Dart (Flutter), SQL

Machine Learning: scikit-learn, Pandas, NumPy, NLP, Computer Vision, Time-Series Analysis, Feature Engineering, Data Preprocessing

Web Development: React, Streamlit, HTML, CSS, Flutter

Tools: Git, GitHub, Firebase

Languages: Arabic (Native), English (Fluent), French (Fluent), Korean (Elementary)

EDUCATION

National Higher School of Artificial Intelligence (ENSIA)

Artificial Intelligence Engineering | 2022 – Present (Expected Graduation: 2027)

Laarbi Ben Mhidi High School — Biskra (Scientific Track)

Baccalaureate score: 18.29/20 | 2022

LEADERSHIP & INTERESTS

Head of the AI Department, SkillnTell Club (ENSIA)

Interests: Machine Learning, NLP, Computer Vision, Industrial AI, Game AI

Achievement: Baccalaureate score 18.29/20
